

Deckchair Sling Installation Instructions

Please be advised to ensure the sling is not damaged in transit, we removed it from the chair. Please see the below instructions on how to fit the sling to the giant deckchair once it arrives:

1. Once the giant deckchair is erect and you are facing the chair as per the photo (left), **unscrew all 3 screws** on both the upper and lower right-hand side of each pole
2. Gently lift the pole above the frame, leaving enough room to slide the sling on, whilst simultaneously sliding the sling on. I recommend two people carry out this task, with one person at the top and one at the bottom assisting to slide the sling on.
3. Once complete, ensure the poles are sitting back within the brace before screwing all 3 screws back in on both poles.

Note: The sling will be tight as it is brand new and will give a little in time.
